Switchable Arm Hot Air Seam Sealing machine SSV-38

This Hot air seam sealing machine is for sealing sewn and ultrasonic seams on:PPE, Hospital gowns, full bodysuits, outdoor waterproof covers, Rainwear/Outerwear, Active wear (skiing, snowboarding, cycling, sailing, climbing, paddling sports, hiking, hunting/fishing, golfing) Industrial work-wear, Waders, Tents, Military garments & gear, Hazardous Material Protective Suits. Etc.

The machine advantage is it has 2x switchable bottom arms, giving you a post setup and at the press of a button it can be switched to a side roller arm wheel, ideal for cuffs and leg hems. These are driven with two stepper motors, driving both the upper and lower wheels.

Settings and Sealing speed, are easy to be adjust, with both the start and end length of the tape easily adjusted and the working temperature is accurately controled, keeping the temperature fluctuation to a minimum

Power Supply	AC 220V 50/60Hz
Heater Power	2.8kw
Compressed Air Mpa	0.35-0.5MPa
Maximum Temperature (°C)	750
Speed Range mpm	1-25m/min
Pinch roller Width	Φ65×30mm
Optional width of Roller	8-30mm
Dimensions LxWxH (mm)	1300mm×600mm×1530mm
Net Weight (kg)	130

This machine does all or part operation of the following joins
