## SSP7050FP Pneumatic Scissor Finger Press Machine

The scissor action of this finger vacuum bonding press gives excellent loading visibility. With the seam pressure boosted by the extra pneumatic cylinder pressing onto the 4 fingers of the vacuum suction bed.

The bucks are CNC milled for accuracy and flatness with a total bed size of 70cm x 50cm

The patented led Plc control system is simple to use and has recordable programming functions that let you program time pressure and vacuum independently.

The temperature of the head buck is adjustable from room temperature up to 200c degrees

The top buck is Teflon coated and the bottom is covered with a knitted cover + needle felt + silicone pad

The press is fully guarded by a safety protection system

Power Supply	380V/3ph/50~60HZ
Heater Power (W)	6kw
Compressed Air (bar)	0.4~0.6Mpa
Maximum Temperature (°C)	230
Speed Range mpm	N/a
Bonding area	Heated top buck
Dimensions LxWxH (mm)	1200x1200x1350mm
Net Weight (kg)	450
